HIGHLIGHTS

INJECTABLES AGENDA

As the injectables market continues to be on the rise worldwide, products and techniques are becoming more elaborate and precise. FACE's Advanced Injectables Masterclass is committed to bringing you a jam-packed agenda with live demos from the best injectors in the UK and abroad, panel discussions on anatomy, combination treatments, the science behind toxins and fillers, and in-depth discussions covering all parts of face and neck. Some live-demos not to be missed include the 3 key injections for the Latin, Asian, and European face, to be performed by the Brazilian Patricia Leite, Thai Rungsima Wanitphakdeedecha, and UK's Tapan Patel, Tom van Eijk's "4 dimensional treatment of the periorbital area", and Kate Goldie and Emma Ravichandran sharing a patient for a Central triangle and perioral framing demonstration, and many more.

SKIN AGENDA

From a 2-hour long Dermatology 101 session to the Innovations in Regenerative Procedures session, there are lectures and panels for new and advanced practitioners. Don't miss out on our Live Show on Peeling, Ruby Ghadially's talk on "Manipulating stem cells to rejuvenate aging skin", Sijad Rajpar's lecture on "Subcision and other non-energy based devices for treating acne scars", and Stefanie William's address on patient-centred medical needling - tailoring by adding meso, PRP or autologous conditioned serum for skin regeneration.

EQUIPMENT AGENDA

As the aesthetics market grows, it is only natural for the research and development in devices sector to continue producing a raft of new technologies. This year, FACE will explore lipolysis technologies, new body shaping and skin tightening technologies, vascular treatments and hair removal devices. Join David Goldberg as he reviews the recent research on HIFEM the latest updates in non-invasive aesthetic body treatments, Erez Dayan as he discusses "Multimodal radiofrequency application for lower face and neck laxity", and Rolf Bartsch's lecture on "Assessment process for non-surgical body treatment".

THREADS AGENDA

A very popular procedure in eastern countries, threads are being increasingly embraced by western practices. This one-day agenda will provide the audience with knowledge on patient assessment and selection to using threads, a discussion amongst specialists about their go-to threads, as well as a session dedicated to outcomes and complications. The sessions will have video demos and plenty of opportunities to ask questions from renowned physicians that have already adopted this procedure, such as Syed Haq, Han Jin Kwon, George Sulamanidze and Pierre Nicolau.

HIGHLIGHTS

HAIR AGENDA

As a full treatment against hair loss or as a complement to a transplant, the demand for non-surgical treatments has grown considerably as new methods and technologies are made available to treat this condition. For 2020, Greg Williams, UK Hair Transplant Surgeon and BAHRS President, is directing an informative and practical agenda on the latest advancement on this very sought-after field. The focus will be on Genetic Testing and Stem Cell Therapy, and Platelet Rich Plasma on hair loss treatment, with presentations from Olivier Amar on adipose derived stem cells, Albert Mascarell on genetic testing to direct treatment and top specialists sharing the PRP device of their choice. Expect a full room like last year!

WORKSHOPS AGENDA

Delegates will be offered to attend various exhibitor workshops to learn about the latest products and services available to the industry. Workshops include lectures, presentations and live demonstrations as well as targeted Q&A sessions at the end.

BUSINESS AGENDA

Whether you are starting a practice now or trying to increase your patients return and loyalty rate, this agenda cannot be missed. For a full day, delegates will be able to learn from their own peers on how they succeeded and how they would do things differently. They will also have first-hand access to the latest regulations for aesthetic practices in the UK, and a session dedicated to showcasing and teaching how to be a social media winner. Lara Devgan will talk about understanding the importance of patient reviews for aesthetic providers. James Dean and Keli Thorsteinsson will share the tips they wish were given to them when they first started, and Alice Hart-Davis will share her experience as a client on the presentation "Communicating with patients - from my perspective as an 'expert patient'."

GENITAL REJUVENATION AGENDA

Genital rejuvenation is a recent breakthrough in the aesthetic arena, responding to the intimate needs of men and women. There are many different aesthetic approaches and procedures available to the practice committed to reconstruct existing defects or inadequate conditions perceived by some patients, improving intimate relationships and emotional well-being. Alex Bader, gynecologist and pioneer on sexual aesthetics in the UK, will lead this fascinating half-day agenda, which includes lectures from Abbas Khaddra on penile augmentation using fillers, David Goldberg on shockwave therapy for erectile dysfunction, and Andreas Lenhard on EBDs in vaginal tissue remodeling.
